April 27, 2021

Dear Chair DeFazio and Ranking Member Graves:

I am requesting funding for the **Norway Road Bridge Replacement** in surface transportation reauthorization legislation.

The project sponsor for this project is the County of Orleans Public Works and the project is located at Norway Road, Kendall, NY 14470.

The funding is designated for replacing two existing bridges that are less than 100-feet apart with one structure.

The project is an appropriate use of taxpayer dollars and is anticipated to have the following benefits: the main structure of the existing bridge spans Sandy Creek and the secondary structure is located to the south and only functions as a high flow event relief structure. The current configuration provides a subpar hydraulic condition and is inadequate to handle current high flow events. This project would eliminate both structures and replace them with one long span structure that is capable of handling high flow events and make the area more resilient to flooding.

I certify that neither I nor my immediate family has any financial interest in this project.

Sincerely,

CHRIS JACOBS
Member of Congress
